

HSBC GIF Global Bond Total Return Fund

Fund Overview

For professional clients only

★★★★
Morningstar Rating™

February 2021

Why use a global bond total return strategy?

- ◆ Fixed income investors need to look for innovative solutions to achieve their investment objectives; employing a core allocation which dynamically exploits the best ideas across all environments and economic cycles will prove invaluable
- ◆ A multi-sector, flexible approach that breaks away from traditional benchmark constraints and maximises the full fixed income investment toolkit
- ◆ Dynamically managing duration and credit exposures provides the versatility to generate attractive return and income regardless of the ever-changing economic environment

Why allocate now?

- ◆ An unconstrained, total return strategy is the optimal expression of global fixed income investing in the current uncertain and low yield environment
- ◆ Investors are not being adequately compensated for taking traditional fixed income long maturity/duration exposure, and need to break away from the limitations of a benchmark
- ◆ With the compression in fixed income yields and with income becoming harder to deliver, investors should look towards incorporating a total return solution to achieve their income goals

Fund Snapshot

- ◆ Lower-for-longer rates and recent credit market rally pushing reassessment of fixed income allocations
- ◆ A dynamic multi-sector fixed income strategy can be an efficient diversifier for broader fixed income allocations
- ◆ A global flexible investment with controlled volatility has a place in a balanced 'core' fixed income solution
- ◆ Unique, uncorrelated, differentiated strategy that captures upside opportunities and protects capital
- ◆ Strong track record which delivers complementary results versus peers

Any performance information shown refers to the past and should not be seen as an indication of future returns.

The figures are calculated in the IC share class base currency, dividend reinvested, net of fees.

2. X share class for institutional investors only. This is a maximum charge.
3. Other share classes are also available including distributing and currency hedged share classes.

Key Risks

The value of investments and any income from them can go down as well as up and investors may not get back the amount originally invested

- ◆ **Exchange rate risk.** Investing in assets denominated in a currency other than that of the investor's own currency perspective exposes the value of the investment to exchange rate fluctuations
- ◆ **Derivative risk (leverage).** The value of derivative contracts is dependent on the performance of an underlying asset. A small movement in the value of the underlying can cause a large movement in the value of the derivative. Over-the-counter (OTC) derivatives have credit risk associated with the counterparty or institution facilitating the trade. Investing in derivatives involves leverage (sometimes known as gearing). High degrees of leverage can present risks to sub-funds by magnifying the impact of asset price or rate movements
- ◆ **Asset backed securities (ABS) risk.** ABS are typically constructed from pools of assets (e.g. mortgages) that individually have an option for early settlement or extension, and have potential for default. Cash flow terms of the ABS may change and significantly impact both the value and liquidity of the contract
- ◆ **Emerging market fixed income risk.** As interest rates rise, debt securities will fall in value. Emerging economies typically exhibit higher levels of investment risk. Higher yielding securities are more likely to default
- ◆ **Contingent Convertible Security (CoCo) risk.** Hybrid capital securities that absorb losses when the capital of the issuer falls below a certain level. Under certain circumstances CoCos can be converted into shares of the issuing company, potentially at a discounted price, or the principal amount invested may be lost
- ◆ **Operational risk.** The main risks are related to systems and process failures. Investment processes are overseen by independent risk functions which are subject to independent audit and supervised by regulators
- ◆ **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- ◆ **Credit Risk** A bond or money market security could lose value if the issuer's financial health deteriorates.
- ◆ **Interest Rate Risk** When interest rates rise, bond values generally fall. This risk is generally greater the longer the maturity of a bond investment and the higher its credit quality
- ◆ **Default Risk** The issuers of certain bonds could become unwilling or unable to make payments on their bonds

For more detailed information on the risks associated with this fund, investors should refer to the prospectus of this fund

Important Information

This document is intended for Professional Clients only and should not be distributed to or relied upon by retail clients.

This document has no contractual value and is not by any means intended as a solicitation, nor a recommendation for the purchase or sale of any financial instrument. This document may be distributed in Switzerland only to qualified investors according to Art. 10 para 3, 3bis and 3ter of the Federal Collective Investment Schemes Act (CISA).

The presented fund is authorised for distribution in Switzerland in the meaning of Art. 120 CISA. (Potential) investors are kindly asked to consult the latest issued Key Investor Information Document (KIID), prospectus, articles of incorporation and the (semi-)annual report of the fund which may be obtained free of charge at the head office of the representative: HSBC Global Asset Management (Switzerland) AG, Gartenstrasse 26, P.O. Box, CH-8002 Zurich. Paying agent: HSBC Private Bank (Suisse) S.A., Quai des Bergues 9-17, P. O. Box 2888, CH-1211 Geneva 1. Investors and potential investors should read and note the risk warnings in the prospectus and relevant KIID. Before subscription, investors should refer to the prospectus for general risk factors and to the KIID for specific risk factors associated with this fund. Issue and redemption expenses are not taken into consideration in the calculation of performance data.

The fund presented in this document is a sub-fund of HSBC Global Investment Funds, an investment company constituted as a société à capital variable domiciled in Luxembourg. The shares in HSBC Global Investment Funds have not been and will not be registered under the US Securities Act of 1933 and will not be sold or offered in the United States of America, its territories or possessions and all areas subject to its jurisdiction, or to United States Persons.

Past performance is no indication to future results of a fund. The performance data do not take account of the commissions and costs incurred on the issue and redemption of units. The material contained herein is for information only and does not constitute legal, tax or investment advice or a recommendation to any reader of this material to buy or sell investments. You must not, therefore, rely on the content of this document when making any investment decisions.

This document is not intended for distribution to or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to law or regulation. This document is not and should not be construed as an offer to sell or the solicitation of an offer to purchase or subscribe to any investment. Any views expressed were held at the time of preparation and are subject to change without notice. While any forecast, projection or target where provided is indicative only and not guaranteed in any way. HSBC Global Asset Management (UK) Limited accepts no liability for any failure to meet such forecast, projection or target.

The value of the underlying assets are strongly affected by interest rate fluctuations and by changes in the credit ratings of the underlying issuer of the assets. The performance of bonds, gilts and other fixed interest securities tends to be less volatile than those of shares of companies (equities). However there is a risk that both the relative yield and the capital value of these may be reduced if interest rates go up.

Important Information

This fund is a sub-fund of the HSBC Global Investment Funds, a Luxembourg domiciled SICAV. UK based investors in HSBC Global Investment Funds are advised that they may not be afforded some of the protections conveyed by the provisions of the Financial Services and Markets Act 2000. HSBC Global Investment Funds is recognised in the United Kingdom by the Financial Conduct Authority under section 264 of the Act. The shares in HSBC Global Investment Funds have not been and will not be offered for sale or sold in the United States of America, its territories or possessions and all areas subject to its jurisdiction, or to United States Persons. All applications are made on the basis of the current HSBC Global Investment Funds Prospectus, Key Investor Information Document (KIID), Supplementary Information Document (SID) and most recent annual and semi-annual reports, which can be obtained upon request free of charge from HSBC Global Asset Management (UK) Limited, 8 Canada Square, Canary Wharf, London, E14 5HQ. UK, or the local distributors. Investors and potential investors should read and note the risk warnings in the prospectus and relevant KIID and additionally, in the case of retail clients, the information contained in the supporting SID.
