

## HSBC Global Funds ICAV

# Shariah Multi Asset Fund

Marketing communication | Monthly report 31 July 2025 | Share class BC

### Investment objective

The Fund aims to provide long term capital growth.

### Investment strategy

The Fund is actively managed and does not track a benchmark.

The Fund will invest in range of instruments which may include, but are not limited to: shares and bonds, funds and other transferable securities. The Fund has the flexibility to allocate investments between these asset classes.

The Fund may invest in: shares including common stocks and other transferable securities in companies of any size that are listed or traded on recognised markets worldwide; investment grade, below investment grade and unrated bonds which can have fixed or floating rates.

The Fund may invest Sukuk and in bonds issued by the Islamic Liquidity Management

Corporation (ILMC), governments, government-related entities and companies in emerging market countries and denominated in the currencies of emerging market countries

The Fund may invest up to 100% in shares of Shariah compliant funds, including exchange traded funds, with up to 20% in a single fund. The Fund may invest substantially in emerging market countries and up to 10% of its NAV in cash.

The Fund will maintain adherence to Shariah principles as interpreted by the Shariah Committee and advised to the Investment Manager and the Management Company.

See the Prospectus for a full description of the investment objectives and derivative usage.

### Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.

## Risk Disclosure

- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
