What is this product?

Type

The Fund is an Irish collective asset-management vehicle ("ICAV"). The Fund's value is dependent on the performance of the underlying assets and may go up as well as down. Any capital invested in the Fund may be at risk.

Objectives and Investment Policy

Investment Objective:

The Fund aims to provide long term capital growth by tracking as closely as possible the performance of the S&P 500 Net Total Return Index (the Index).

Investment Policy:

The Index is comprised of the 500 largest companies (based on the market value of their shares, also known as market capitalisation) in the United States, as defined by the Index provider.

The Fund is passively managed and aims to invest in the shares of the companies in generally the same proportion as in the Index.

There may be circumstances when it is not possible or practical for the Fund to invest in all constituents of the Index.

If the overall portfolio matches the characteristics of the Index, the Fund can also invest in companies outside the Index but which are expected to provide similar performance and risk characteristics to certain Index constituents.

If the Fund cannot invest directly in the companies that constitute the Index, it can gain exposure by using other investments such as depositary receipts, derivatives and funds.

The Fund may invest in money market instruments (which includes bills, commercial paper and certificates of deposits).

The Fund may invest up to 10% of its assets in other funds, including HSBC funds.

The Fund may also invest up to 10% of its assets in total return swaps. However, this exposure is not expected to exceed 5%.

The Fund may invest up to 20% in securities from a single issuer, however in special market conditions the Fund can invest up to 35%.

The Fund may also invest in derivatives for hedging and efficient portfolio management purposes (such as to manage risk and costs, or to generate additional capital or income).

- ◆ The Fund may enter into securities lending transactions for up to 30% of its assets. However, this is not expected to exceed 25%.

- ◆ The reference currency of the Fund is USD. The reference currency of this share class is USD.
- ◆ Income is reinvested.
- ◆ You may sell your investment on most working days.
- ◆ The anticipated level of tracking error in normal market conditions is expected to be 0.20%.

Intended Retail Investor

Designed for investors seeking capital appreciation and planning to invest for at least 5 years. The Fund may appeal to investors who are looking for a core equity investment and are interested in low cost exposure to the US equity market.

An investment in the Fund is only suitable for investors who are capable of evaluating the risks and merits of such an investment, and who have sufficient resources to bear any loss as the Fund is not guaranteed and they may receive back less than the amount invested. The Fund is designed for use as part of a diversified investment portfolio. Prospective investors should consult with their financial advisor before making an investment.

Term:

The Fund does not have a maturity date.

The PRIIP Manufacturer cannot terminate the Fund unilaterally. The Board of Directors may furthermore decide to liquidate the Fund in certain circumstances set out in the prospectus and articles of incorporation of the Fund.

Additional Information:

This document describes a single share class of a sub-fund of the UCITS. Further information about the UCITS including the Prospectus, the most recent annual and semi-annual reports of the UCITS and the latest prices of shares, may be obtained free of charge, in English, from the Administrator by emailing ifsinvestorqueries@hsbc.com, or by visiting www.global.assetmanagement.hsbc.com. The most recent Prospectus is available in English and French. The Prospectus, annual and semi-annual reports are prepared for the entire UCITS.

The Depositary is HSBC Continental Europe. The Fund's assets are kept safe by the Depositary and are segregated from the assets of other Funds.

It is possible to switch your shares into shares of a different share class or sub-fund within the ICAV. Details of how to do this are in the "How to convert between sub-funds / Classes" section of the Prospectus.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended Holding Period: 5 Years		If you exit after 1 year	If you exit after 5 years
Investment of USD 10,000			
Minimum	The Fund is not covered by an investor compensation or guarantee scheme, you may lose some or all of the amount invested.		
Stress Scenario	What you might get back after costs	USD780	USD2,010
	Average return each year	-92.23 %	-27.43 %
Unfavourable Scenario	What you might get back after costs	USD7,730	USD11,810
	Average return each year	-22.74 %	3.39 %
Moderate Scenario	What you might get back after costs	USD10,890	USD17,760
	Average return each year	8.94 %	12.17 %
Favourable Scenario	What you might get back after costs	USD14,770	USD21,930
	Average return each year	47.69 %	17.00 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. The unfavourable scenario occurred for an investment between December 2023 and December 2024. The moderate scenario occurred for an investment between November 2015 and November 2020. The favourable scenario occurred for an investment between October 2016 and October 2021. A suitable benchmark was used where the Fund had insufficient history.

What happens if HSBC Investment Funds (Luxembourg) S.A. is unable to pay out?

The Fund's ability to pay out would not be affected by the default of HSBC Investment Funds (Luxembourg) S.A.. The Fund's assets are kept safe by the Depositary and are segregated from the assets of other Funds. This means that the holdings of one Fund are kept separate from the holdings of the other Funds and your investment in the Fund cannot be used to pay the liabilities of any other Fund. There is a potential liability risk for the Depositary if the assets of the Fund are lost. The Depositary is liable in case of its negligent or intentional failure to properly fulfil its obligations. In the event of a bankruptcy or insolvency of the Depositary or other service provider, investors could experience delays (for example, delays in the processing of subscriptions, conversions and redemption of shares) or other disruptions and there may be a risk of default. The Fund is not covered by an investor compensation or guarantee scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- ◆ In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- ◆ USD 10,000 is invested.

Recommended Holding Period: 5 Years		If you exit after 1 year	If you exit after 5 years
Investment of USD 10,000			
Total Costs		511 USD	1,040 USD
Annual cost impact % *		5.1%	1.3% each year

* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 13.46% before costs and 12.17% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

These figures include the maximum distribution fee that the person selling you the product may charge up to 5.00%. This person will inform you of the actual distribution fee.
