

HSBC ETFs PLC

HSBC JAPAN SCREENED EQUITY UCITS ETF

Marketing communication | Monthly report 28 February 2026 | HSJD SW | USD

Investment objective

The Fund aims to track as closely as possible the returns of the FTSE Japan ESG Low Carbon Select Index (the Index). The Fund will invest in or gain exposure to shares of companies which make up the Index. The Fund qualifies under Article 8 of SFDR.

Investment strategy

The Index is a subset of the FTSE Japan Index (the Parent Index) and made up of companies in the Japan, as defined by the Index Provider.

The Index seeks to achieve a reduction in carbon emissions and fossil fuel reserves exposure, and an improvement of the FTSE Russell ESG rating against that of the Parent Index. It excludes shares of companies with exposure to: tobacco, thermal coal extraction, electricity generation, gambling, adult entertainment and controversial weapons. The Index also applies, among others, the United Nations Global Compact exclusionary criteria.

The Fund will be passively managed and will aim to invest in the shares of the companies in generally the same proportion as in the Index.

The Fund may invest up to 35% in securities from a single issuer during exceptional market conditions.

The Fund may invest up to 10% in funds and up to 10% in total return swaps and contracts for difference.

See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").

Sustainability indicators	Fund	Broad market index
Carbon emissions intensity	39.27	82.86
Fossil fuel reserves intensity	27.71	239.02

Carbon emissions intensity - Carbon Intensity measures the quantity of carbon emission of a company (tonnes CO²e/USD million)
 Source of analytics: Trucost

Fossil fuel reserves intensity - Fossil Fuel Reserves Intensity describes the quantities of greenhouse gas emissions that could be generated if the proven and probable fossil fuel reserves owned by companies were realised and burned. (tonnes CO²e/USD million Market Cap)

FTSE ESG Score	ESG score	E	S	G
Fund	4.6	4.5	4.6	4.5
Broad market index	3.9	3.7	3.9	4.0

Provides a measure of a company's exposure to, and management of, ESG issues in multiple dimensions. The ESG Ratings are comprised of an overall Rating that breaks down into underlying Pillar and Thematic Exposures and Scores. A higher number indicates a more favourable ESG profile in the view of FTSE.

Risk Disclosure

- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

Index Disclaimer
