

## HSBC Global Investment Funds

# MANAGED SOLUTIONS - ASIA FOCUSED CONSERVATIVE

Marketing communication | Monthly report 30 April 2026 | Share class ACHKD

### Investment objective

The Fund aims to provide long term capital growth and income through an active asset allocation in a diversified portfolio of bonds and shares, as well as money market and cash instruments.

### Investment strategy

The Fund is actively managed and is not constrained by a benchmark. At least 70% of the Fund's exposure is to bonds and shares related to Asia-Pacific excluding Japan. The Fund may invest in non-Asian based assets. The Fund may invest in bonds that are investment grade, non-investment grade and unrated issued or guaranteed by governments, government-related and supranational entities, and companies based in developed markets and emerging markets. The Fund may invest up to 20% in onshore Chinese bonds and 10% in non-investment grade. The Fund may invest up to 15% in China A and China B-shares. The Fund may invest up to: 10% in convertible bonds; 10% in contingent convertible securities; 10% in non-investment grade bonds issued by a single government issuer; and can invest up to 10% in commodities and up to 10% in liquid alternative investment strategies. The Fund may invest up to 50% in other funds; 10% in real estate investment trusts and has a primary currency exposure to Asia-Pacific (excluding Japan) countries. See the Prospectus for a full description of the investment objectives and derivative usage.

### Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is generally greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless. The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

## Risk Disclosure

- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
