What is this product?

Type

The Fund is an investment company incorporated as a société anonyme qualifying as a Société d'Investissement à Capital Variable. The Fund's value is dependent on the performance of the underlying assets and may go up as well as down. Any capital invested in the Fund may be at risk.

Objectives and Investment Policy

Investment Objective:

The Fund aims to provide long term capital growth and income with a low correlation to traditional asset classes. The Fund's average volatility is expected to be around 7% over the investment horizon. It may fluctuate due to market conditions and the annualised volatility could be lower or higher than this level.

Investment Policy:

The Fund targets returns that are less sensitive to market fluctuations and targets an average volatility (fluctuations in the price of a security) of 7%.

The Fund takes 'long' positions (if there is an expectation for assets to rise in value) or 'short' positions (if there is an expectation for assets to fall in value) and uses a range of investment styles (Styles). The Fund invests across a diversified range of asset classes (including equity, fixed income, and currency) on a global basis, including emerging markets.

The Styles employed by the Fund include a carry strategy (which aims to take long positions in higher yielding assets and short positions in lower yielding assets), value strategy (which aims to take long positions in undervalued assets and short positions in overvalued assets) and momentum strategy (which aims to take long positions in assets with higher recent performance and short positions in assets with lower recent performance). The Styles are expected to have low correlation to each other.

The Fund implements the Styles by primarily investing (both long and short positions) in financial derivative instruments including, but not limited to, equity futures, bond futures, interest rate swaps and currency forwards (including non-deliverable forwards).

Companies and/or issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies, which may change from time to time. Please refer to the Prospectus for further details on excluded activities.

The Fund may invest in short-term bonds (or similar securities), money-market instruments, bank deposits and cash for treasury purposes. The Fund may invest up to 10% of its assets in other funds, including HSBC funds.

To implement the above strategies, the Fund mostly uses financial derivative instruments. The Fund may use them for hedging, cashflow management and investment purposes. Derivatives may also be embedded in other instruments used by the Fund.

- ◆ The Fund may enter into securities lending transactions for up to 29% of its assets. However, this is not expected to exceed 25%.
- ◆ The reference currency of the Fund is EUR. The reference currency of this share class is EUR.
- ◆ Income is reinvested.
- ◆ You may sell your investment on most working days.
- ◆ The Fund is actively managed and does not track a benchmark. The Fund has an internal or external target to a reference benchmark, Euro Short-Term Rate (ESTR).

Intended Retail Investor

The Fund may be suitable for investors with a medium term investment horizon. The Fund is intended for sophisticated investors aiming for an investment that provides exposure to different asset classes that are mainly achieved by using financial derivative instruments that have the potential to reduce liquidity and increase the volatility of returns. The Fund may be suitable for investors looking for a single strategy fund to add to an existing diversified portfolio.

An investment in the Fund is only suitable for investors who are capable of evaluating the risks and merits of such an investment, and who have sufficient resources to bear any loss as the Fund is not guaranteed and they may receive back less than the amount invested. The Fund is designed for use as part of a diversified investment portfolio. Prospective investors should consult with their financial advisor before making an investment.

Term:

The Fund does not have a maturity date.

The PRIIP Manufacturer cannot terminate the Fund unilaterally. The Board of Directors may furthermore decide to liquidate the Fund in certain circumstances set out in the prospectus and articles of incorporation of the Fund.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended Holding Period: 3 Years		If you exit after 1 year	If you exit after 3 years
Investment of EUR 10,000			
Minimum	The Fund is not covered by an investor compensation or guarantee scheme, you may lose some or all of the amount invested.		
Stress Scenario	What you might get back after costs	EUR7,720	EUR8,010

Favourable Scenario	What you might get back after costs	EUR10,660	EUR11,250
	Average return each year	6.60 %	3.99 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. The unfavourable scenario occurred for an investment between May 2020 and May 2023. The moderate scenario occurred for an investment between July 2018 and July 2021. The favourable scenario occurred for an investment between December 2015 and December 2018. A suitable benchmark was used where the Fund had insufficient history.

What happens if HSBC Investment Funds (Luxembourg) S.A. is unable to pay out?

The Fund's ability to pay out would not be affected by the default of HSBC Investment Funds (Luxembourg) S.A.. The Fund's assets are kept safe by the Depository Bank and are segregated from the assets of other Funds. This means that the holdings of one Fund are kept separate from the holdings of the other Funds and your investment in the Fund cannot be used to pay the liabilities of any other Fund. There is a potential liability risk for the Depository if the assets of the Fund are lost. The Depository is liable in case of its negligent or intentional failure to properly fulfil its obligations pursuant to the 2010 Law. In the event of a bankruptcy or insolvency of the Depository Bank or other service provider, investors could experience delays (for example, delays in the processing of subscriptions, conversions and redemption of shares) or other disruptions and there may be a risk of default. The Fund is not covered by an investor compensation or guarantee scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- ◆ In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- ◆ EUR 10,000 is invested.

Recommended Holding Period: 3 Years Investment of EUR 10,000	If you exit after 1 year	If you exit after 3 years
Total Costs	550 EUR	1,106 EUR
Annual cost impact % *	5.5%	3.5% each year

* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.26% before costs and 0.75% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount. These figures include the maximum distribution fee that the person selling you the product may charge up to 3.10%. This person will inform you of the actual distribution fee.
